I am a Front End developer and Javascript mentor with two years of experience developing web applications using Html, CSS, Javascript libraries like React.js, and Next.js, handling Api rest, databases, and Agile Methodologies like SCRUM. I also have experience in UI Design and UX. I consider myself a self-taught enthusiast and passionate about programming and Javascript Stack. I'm in constant search of new challenges to keep growing professionally and be able to apply them every day.

EXPERIENCE

Coderhouse.com, JavaScript Mentor — FEB, 2020 - SEPT, 2022

- I teach more than 25 students per course basic and advanced Javascript programming concepts.
- I finished the courses with 90% satisfaction of my students on the platform.
- I correct more than +40 exercises per week on time.
- I taught special classes oriented to agile methodologies and object-oriented programming.

Tech Stack: JavaScript, Node.js.

Air Computers, Frontend developer — MAR, 2020 - AGU, 2022

- My first complete goal was to improve the loading time of web pages by an image optimizer and a preloader.
- We re-write base code and several components to Improve 80% the performance of the UI of the current institutional app.
- I increased the company's e-commerce sales with my proposal to rebrand the brand and create a new user experience.
- I connected the company's stock products database with the virtual stores of different company clients. We were top in sales in the city thanks to that.
- I developed a web application to store Microsoft digital licenses distributed by my company. I worked with Microsoft support in the process. We agility the time in sales and distribution of software from Microsoft.

Tech Stack: HTML, CSS, JavaScript, React.js, Next.js, Node.js, GraphQL, Tailwind, SQL, Strapi.js, WordPress, Mailchimp, Shopify.
